It runs thus: "My attainments anywhere near the boundary of scholar-ship are so very meagre that I dislike to receive such a compliment as your society has paid me. I never spent a day in any sort of seminary above a common school (which was exceedingly common in my time). Since I was eight years old, I have only seen the inside of schoolhouse in winter; since fourteen not at all; and our terms did not average five months per anuum in those days. know a little newspaper Latin and French, and might have mastered a little Greek the same way if the barbarians bad known enough to use an intelligible alphabet. Of mathematics, I learned what is contained in Adam's arithmetic; of grammar, just enough to see clearly that Lindley Murray knew very little, and blundered shockingly. As to chirography, mine speaks for ilself, not clearly as to matter, but quite distinctly enough as to manner. However I know a little of what may be fished up on a tolerably busy and razged journey through the world, having always loved books better than play, and devoured newspapers with insane avidity. Thanks ing your society for the honor intended me, and meaning to justify it by L faithful obedience to the maxim "live and learn." I temain yours truly, HORACE Some one has written beautifully to
